

Shubhra Shankha Roy

CLOUD & DEVOPS ENGINEER

Mobile No: +91-9474092775

E-mail: shubhraroy23@outlook.com

Address: Kolkata, India

LinkedIn: <https://www.linkedin.com/in/shubhra-shankha-roy>

Dedicated and results-oriented IT professional with 13 years of track record, including 7 years specializing in cloud technologies and DevOps primarily in Microsoft Azure. My deep-rooted passion for cloud computing and infrastructure has driven me to excel in designing and deploying cloud application solutions that meet the highest standards of security, performance and viability. With a robust background in infrastructure as code, I aspire to leverage my expertise to DevOps methodologies. Committed to optimizing cloud solutions, I am keen on contributing to an organization that values proactive strategies, technical leadership and embraces the latest advancements in technology.

PROFESSIONAL SUMMARY

- **Azure Cloud Expertise:** Proficient in Microsoft Azure network architecture, infrastructure design, deployment, and management.
- **DevOps & CI/CD:** Experienced in Azure DevOps, implementing CI/CD pipelines for streamlined software delivery.
- **Automation:** Skilled in infrastructure automation using Terraform, enhancing efficiency by reducing provisioning times.
- **Cloud Migration:** Successfully executed lift-and-shift migrations with Azure Migrate Tool, optimizing performance and cost.
- **Cost Optimization:** Proven track record in reducing cloud expenditures through strategic planning and cost management.
- **Security:** Deep knowledge of cloud security practices, improving infrastructure security scores with recommendations from Microsoft Defender for Cloud.
- **Leadership:** Strong leader with experience managing cross-functional teams and engaging stakeholders to foster collaboration.

WORK EXPERIENCE

EY Global Delivery Services India LLP

Manager (Kolkata) (Nov 2024 - Present)

- Designed and implemented efficient CI/CD pipelines with Azure DevOps, accelerating deployment time by 35% and reducing deployment failures by 50% and streamlining deployments across multiple environments (Dev, QA, Staging, Production).
- Optimized resource utilization by implementing and managing Infrastructure as Code (IaC), reducing cloud resource consumption by 25% and operational costs by 18%. Provided on-call support for critical systems, ensuring 99.95% uptime and reducing mean time to resolution (MTTR) by 30%.
- Leveraged Docker to create and manage containerized applications, improving resource utilization by 30%. Developed and maintained Kubernetes manifests, achieving 99.9% application availability and enabling 3x horizontal scaling.
- Led a team of 5+, achieving a 95% on-time delivery rate and increasing team productivity by 30% through effective collaboration and mentorship.
- Translated complex client requirements into efficient cloud designs focused on performance, scalability, availability & security.
- Engaged with clients in various sectors for requirements analysis, delivery coordination, and sprint planning in an Agile environment. Delivered customized solutions to meet unique client needs, improving client satisfaction by 15%.

MOL Information Technology India Pvt. Ltd.

Senior Analyst (Kolkata) (Sep 2022 - Oct 2024)

- Designed end-to-end Azure network architecture, creating detailed topology diagrams that enhanced network clarity, improved security by identifying and addressing potential gaps, and reduced downtime by 30% through more efficient troubleshooting.
- Enabled private endpoints and service endpoints, enhancing security of Azure infrastructure by 70%.
- Implemented Application Gateway, Azure Front door, Traffic Manager as Global Entry points of Web applications which help to achieve 30% increase in network reliability and a 40% reduction in downtime.
- Monitored and analyzed Web Application Firewall (WAF) logs, resulting in 50% decrease in security incidents.
- Automated cloud infrastructure deployment using Terraform via CI/CD pipeline which reduces infrastructure provisioning time almost 50%.
- Collaborated in Hub and Spoke Architecture projects, leading to a 20% reduction in cloud infrastructure costs.
- Implemented recommendations from Microsoft Defender for Cloud (Azure Security Center), improving Azure environment security score by 15%.
- Enhanced network security by 60% with Azure Firewall and Bastion services, reducing vulnerabilities and improving compliance.

Tata Consultancy Services Ltd.

Assistant Consultant (Kolkata) (Jul 2021 - Sep 2022)

- Conducted lead architect assessment meetings with clients to thoroughly understand their needs and identify gaps between their requirements and technical functionalities. Collaborated with all stakeholders to develop and deliver tailored, innovative solutions, resulting in 30% increased client satisfaction and 25% faster project delivery.
- Established Site to Site (S2S) VPN Gateway, securing connections for 10+ critical on-premise applications.
- Executed Lift and Shift Migration of 50+ VMware systems to Azure Cloud using Azure Migrate Tool, enhancing system efficiency by 25%.
- Architected n-tier applications, achieving modular design with clear separation of concerns. This approach enabled independent scaling of each tier, improved maintainability with easier updates, increased security and provide a superior user experience.
- Managed and maintained Azure budget at the resource group and subscription level, achieving a 20% reduction in cloud expenditure through strategic cost optimization and efficient resource allocation.
- Conducted bi-annual Disaster Recovery Drills, ensuring robust data protection and business continuity with 100% compliance and successful recovery outcomes.
- Conducted Azure Infrastructure training sessions for 50+ team members, enhancing overall team proficiency by 20%.

Tata Consultancy Services Ltd.

IT Analyst (Kolkata, Taiwan) (Apr 2016 - Jun 2021)

- Created and managed Azure Virtual Network setups and VPN connectivity, reducing latency by 15%.
- Diagnosed and resolved complex network connectivity and performance issues, significantly improving system reliability and reducing downtime by 40%.
- Designed and configured high-availability solutions using Azure Availability Sets, Availability Zones, and Azure Virtual Machine Scale Sets, resulting in a 30% improvement in system uptime and resilience.
- Designed and implemented comprehensive monitoring solutions using Azure Monitor, Log Analytics workspace, and Application Insights, resulting in a 30% increase in system visibility and a 25% reduction in incident response time.
- Developed automated access restrictions for Azure App Services and Storage Accounts using PowerShell scripts, reducing configuration time by 50% compared to manual processes and enhancing overall security..
- Designed Network Security Groups (NSGs) to control inbound and outbound access to network interfaces (NICs), VMs and subnets, increasing Network security by 40%.
- Streamlined user management by creating and configuring 100+ users in Azure Active Directory via Azure portal, improving administrative efficiency by 40% and enhancing security through robust role-based access control implementation.
- Optimized cost efficiency, performance, security of Azure resources by strategically implementing actionable insights and recommendations from Azure Advisor.

Tata Consultancy Services Ltd.

System Engineer (Kolkata) (Dec 2011 - Mar 2016)

- Configured Operating units in Oracle iProcurement module, SCM Module
- Developed and debugged PL/SQL code, improving system performance and reducing errors by 25%.
- Provided production support for day-to-day business issues, achieving a 95% resolution rate.

SKILLS

Technical Skills: Azure DevOps, Cloud Networking (Azure, AWS), Cloud Migration, Cloud Infrastructure, Azure DNS Management, Infrastructure As Code (Terraform), Azure CLI, PowerShell, Bash, Python, Kubernetes, AKS

Soft Skills: Stakeholder Management, Leadership, Teamwork, Problem-solving, Communication

EDUCATION

Siliguri Institute of Technology, Siliguri, West Bengal, India (2007 - 2011)

B.Tech in Computer Science & Engineering

CERTIFICATIONS

- Microsoft Azure Fundamentals AZ - 900 (Microsoft)
- Microsoft Azure Solution Architect Expert - AZ -305 (Microsoft)
- Microsoft Azure Administrator Associate - AZ -104 (Microsoft)
- Microsoft Certified: Security, Compliance, and Identity Fundamentals (Microsoft)
- Terraform Associate (003) (HashiCorp)
- Microsoft Certified: Azure Network Engineer Associate- AZ -700 (Microsoft)
- Microsoft Azure Data Fundamentals DP-900 (Microsoft)
- Designing and Implementing Microsoft DevOps Solutions AZ-400 (Microsoft)
- Microsoft Certified: Azure Security Engineer Associate (Microsoft)
- CKA: Certified Kubernetes Administrator (The Linux Foundation)

ACHIEVEMENTS

- **Technical Reviewer for "AWS Cloud Practitioner's Exam Guide":** Featured by AVA™ - An Orange Education Label as a technical reviewer for the physical book, contributing expertise to enhance the accuracy and quality of AWS cloud certification resources. <https://rb.gy/gnnu75>
- **Special Achievement Award:** At Tata Consultancy Services (TCS) I was recognized for exceptional performance and significant contributions to the organization, demonstrating excellence in project execution and innovative solutions.
- **Special Initiative Award:** Honored for outstanding initiative and leadership, contributing to key organizational goals and driving impactful improvements at Tata Consultancy Services (TCS).
- **Service & Commitment Award:** Celebrated for dedicated service and commitment, marking a decade of successful contributions and professional growth at Tata Consultancy Services (TCS).
- **Achiever Extraordinaire Award:** I'm incredibly honored to receive the Achiever Extraordinaire Award at EY. It's a reflection of the hard work, dedication, and the unwavering support I've received from my team and mentors.
